

FOR IMMEDIATE RELEASE:

Fully Adjustable Outer Tie-Rod Ends

Baer Brake Systems, Phoenix, AZ., presents their fully adjustable outer tie rod ends. The Baer "Trackers" feature a 6061 T-6 fully machined sleeve (anodized black), that is mated to a Teflon lined heim joint and machined pin which has correct taper so spindles are not required to be drilled/modified. These are vehicle specific pieces that help correct bumpsteer issues do to modified suspensions and/or poor OE design. Baer is now also listing bumpsteer "tracker" pieces online for the enthusiast looking to build their own ends, best of all these are made in the USA!
