

# Borgeson Quick Ratio Mopar Power Steering Box

## Press Release:

Borgeson Quick Ratio Mopar Power Steering Box:

Borgeson Universal has now developed and is producing a modern quick ratio power steering conversion box for the 1962-1979 Mopars. This Borgeson conversion box is a remanufactured modern power steering gearbox that has undergone extensive modifications to be a direct bolt in for 1962-1979 Mopars. The Borgeson conversion box will fit with NO modifications to the stock frame or K-member and is a direct bolt in to the factory mounting location with only minor steering column modifications. The Borgeson conversion box is a quick 14:1 ratio power steering box with only 3.5 turns lock-to-lock and a firm modern feel. Conversion box is offered with either a 1-1/8" or 1-1/4" sector shaft to fit the two available original pitman arms. For full application and technical information please visit [www.borgeson.com](http://www.borgeson.com)

Borgeson Quick Ratio Mopar Power Steering Box \$749.00
