Air Ride Technologies

PRESS RELEASE

Load leveling systems made easy...
RideTech is the industry leader in performance air suspension systems for all types of performance vehicles. Now RideTech has developed an advanced engineered product line offering a simple yet effective load leveling system designed to maintain your trucks ride height while providing an improved ride quality. The TowPRO systems is a vehicle specific kit, engineered to bolt into your application without any modifications. visit www.ridetech.com/towpro for additional info.

- RideTech/Fox towing tuned shocks optimize ride quality and stability... loaded or unloaded. Now your \$40,000 truck can ride and handle like it should... even when loaded. AND...they carry the famous RideTech 1,000,001 mile warranty!
- Easy BOLT ON Installation - most kits use existing mounting points and require no drilling! Many systems can be installed in 2-3 hours.
- RideTech/Firestone airsprings increase load capacity, restore ride height, and improve stability.
- OEM style integrated compressor/control module means easy installation and reliable operation. Sealed wiring harness saves installation time and provides years of reliable service.
- SmartSensor control system automatically maintains proper ride height loaded or unloaded. No driver input required, but can still be manually operated if necessary.
- **Applications: Chevy, Dodge, Ford: 1/2 ton - 1 Ton**
