Rocket Tach

Classic Instruments releases a retro styled half sweep tachometer

Rocket Tach™

Color changing
rocket boosters!

Normal Driving

Speeding

Blast Off!

Classic Instruments is pleased to announce the release of the Rocket Tach (part no. RT80SLF). The retro styled, half sweep tachometer features a dual layer design, color changing rocket booster, a red pointer, and a rich black face with bright white numerals and indices. Finished with a stainless low step bezel and flat glass the Rocket Tach comes mounted in a chrome cup that allows for a variety of mounting positions. Stock calibrated for eight cylinder engines the Rocket Tach can be special ordered for other configurations. Computer generated signals will require the use of an SN76 adaptor (not included). Great for completing that nostalgic look with the latest electronic technology, the Classic Instruments Rocket Tach is truly a blast from the past!
