## Take the mystery out of EFI

**NORTH BRANCH, Minn.**— Converting from a carbureted fuel system to electronic fuel injection (EFI) improves the performance, driveability, and fuel economy of any classic vehicle. Installing a complete aftermarket EFI system may seem too complex, but it is within your reach by using the clear and easy-to-understand, step-by-step instructions. You will be able to confidently install the correct EFI system in your vehicle and enjoy all the benefits.

A variety of EFI Systems are currently available—throttle body injection (TBI), multi port fuel injection (MPFI), stack systems, application specific, and special application systems. Author Tony Candela reveals the attributes of each, so you can select the system that's ideal for your car. Then Candela explains in exceptional detail how to install both of these systems. The book also delves into integrating ignition and computer control with these aftermarket systems so you can be out driving rather than struggling with tuning. Turbocharged, supercharged, and nitrous applications are also covered.

A well-installed and -tuned EFI system greatly improves the performance of a classic V-8 or any engine because the system delivers the correct fuel mixture for every operating condition. Get faster starts, better fuel economy, and crisp efficient performance.

Tony Candela has been in the automotive aftermarket electronics industry for 20 years and has held positions ranging from installation to regional sales management. In his tenure, he has worked for two different aftermarket electronics manufacturers, Clifford Electronics and Rockford Fosgate. Tony has written and given hundreds of seminars on the topics of installation, application, wiring, and basic automotive electronics. He has written two previous books for CarTech: *Automotive Electrical Performance Projects* and *Automotive Wiring and Electrical Systems*.

The 8.5 x 11" softbound book (ISBN: 978-1-61325-083-9) features 144 pages packed with 305 color photos and charts. This April 2014 release may be ordered for \$24.95 plus \$6.95 shipping and handling by calling CarTech at 1-800-551-4754 or by visiting [www.carttechbooks.com/efi-conversions](http://www.carttechbooks.com/efi-conversions).
