Superior PowerPak Piston Assemblies now available for 6.2L GM LT1

Fletcher, NC... MAHLE Motorsports introduces the 6.2L GM LT1 PowerPak piston assemblies for standard 3.622" and 4.000" stroke applications. Designed with canted valve pockets matching the true valve geometry of the OE cylinder heads. The pistons are triple coated with a phosphate dry film to protect the pin bores from galling, MAHLE's anti-friction Grafal® on the skirts and hard anodizing of the top ring grooves to protect them against micro-welding. The 6.2L LT1 assemblies come complete with German steel pins, race proven round wire locks and now the latest 1mm, 1mm, 2mm HV385 Steel performance ring sets.

MAHLE, the world's largest piston manufacturer operates its U.S. Motorsports division in Fletcher, NC. For more information, contact www.mahlemotorsports.com, or call toll free: [888-255-1942](tel:888-255-1942).
