

FAST® XFI Street™ Engine Management System Provides Complete Control For Any Type Of Naturally Aspirated Engine

Memphis, TN – The latest fuel delivery system from FAST® is a tunable ECU based on EZ-EFI® Fuel hardware and harnessing, but with learning capability similar to XFI Sportsman™ and XFI 2.0™ options.

FAST® engineers have designed an all-new laptop-tunable ECU to appeal to customers and dealers with simple EFI needs, but who prefer the greater flexibility afforded by laptop tuning. The XFI Street™ Engine Management System provides a cost-effective option for those customers who don't need the most high-end system, but want complete control. Since XFI Street™ uses the same wiring as the EZ-EFI®, it could easily be installed in place of an existing EZ-EFI® ECU. Utilizing included C-Com® software, XFI Street™ can easily deal with even the most challenging engine combinations. The XFI Street™ Engine Management System has data logging capability when connected to a laptop. It is intended only for naturally aspirated engines. The unit is offered in kit form with a multi-port harness or with an EZ-EFI® four-injector throttle body and harness. A retrofit kit is also available for adding an XFI Street™ ECU to an existing EZ-EFI® installation.

Quick Facts

Product: FAST® XFI Street™ Engine Management System

Part Number: #30400 (Multi-port); #304001 (w/ EZ-EFI® Throttle Body); #304003 (Retrofit Kit)

Street Price: \$621.09 – \$1,849.95

Social Media Pitch: The FAST® XFI Street™ Engine Management System is a laptop-tunable ECU based on EZ-EFI® hardware, with additional learning capability

Features & Benefits:

- Perfect for custom individual runner induction systems
- Easy-to-use software for novice & experienced tuners
- Data logging makes tuning & troubleshooting easier
- Advanced diagnostics help maintain peak performance
- Direct plug-in capability w/ EZ-EFI® Fuel wiring harness & throttle bodies; only need to replace ECU to upgrade system

About FAST®

In 2001, FAST® was acquired by the COMP Performance Group™ and moved its headquarters to Memphis, TN, to become the popular electronics company that we know today. After more than a decade in the performance aftermarket industry, FAST® is the recognized leader in advanced EFI technology. Now, not only does FAST® offer the components to adapt virtually any engine to fuel injection, it is also an emerging force in the ignition market. With the latest in easy-to-use electrical components, the experts at FAST® have everything that you need to make high-tech horsepower.
